

Management Information Systems

Designed as a supplement to texts on Management Information Systems (MIS), this text aims to provide students with the opportunity to apply and reality-test course concepts to the solution of actual business problems.

MIS is an interdisciplinary major focusing on how to leverage technology, people and processes to help improve, transform and support business operations. A management information system (MIS) is a computer system consisting of hardware and software that serves as the backbone of an organization's operations. Management information system (MIS) managers focus on an organization's information system and technology. MIS appeals to students who

Management Information Systems (MIS) is a hands-on major which equips students with real-world skills that are in demand in the job market. Our program

MIS (management information system) is a computer-based system that provides managers with tools to organize, evaluate and manage departments. Management information system or management information systems (MIS) refers to the complementary networks of hardware and software cooperating to collect, process, store, and disseminate information in order to support the managerial role of leveraging information technology to increase business value and profits. A management information system (MIS) is a computerized database of financial information organized and programmed in such a way that it produces regular reports on operations for every level of management in a company. It is usually also possible to obtain special reports from the system easily.
