Spirituality is a book about the spiritual life that doesn't tell you what to believe. Have you ever heard someone say: 'I'm spiritual, but not religious.' Or 'It's easier for me to find God in nature than in a church.' Or 'I can't limit myself to just one faith tradition: I see God in all of them.' If statements like these make sense to you, you're not alone. Today, more people are searching for spiritual experience outside traditional channels of religious faith. But even alternative or New Age spiritualities are often filled with dogma and prescribed notions of how to behave and what to believe. By contrast, Carl McColman's book answers the question 'What is spirituality, and why does it matter?' with insights drawn not only from religious traditions, but also from popular culture. Here the emphasis is on celebrating the many ways spirituality makes a powerful and positive difference in our lives.
